ATTENDING PHYSICIAN & TRAUMA REPORT -- REGIONAL TRAUMA CENTER & MEDICAL EXA

Attending Physician: Dr. Raymond Chen, MD (Orthopaedic & Forensic Trauma Surgery, License #WA-33921)

Decedent: Marcus Thorne | Claim ID: CLM-ADD-1003 | NIH Clinical Case Reference: PMC5702695 (PMID: 29181345)

Diagnosis & Trauma Mechanism: ICD-10 S42.001A / W15 -- High-energy vertical fall trauma resulting in gross inferior displacement of a comminuted right clavicular fracture penetrating the pleural cavity with associated traumatic pneumothorax.

Radiograph Findings: Anteroposterior trauma bay chest radiograph (PMC5702695 Fig. 1) confirms gross displacement of the right proximal/mid-third clavicle fracture with intrapleural penetration and partial right lung collapse.

Incident Investigation Notes: National Park Mountain Rescue recovered decedent at 4,250 meters elevation on Liberty Ridge, Mount Rainier. Decedent was performing unroped free-solo technical alpine ice climbing without belay protection when an ice shelf sheared. Toxicology negative (BAC 0.00%).

Certified Medical & Coroner Record submitted for Claim CLM-ADD-1003 | NIH Open-i Case Source: PMC5702695 (PMID: 29181345).
