ATTENDING PHYSICIAN STATEMENT (APS) -- DEPARTMENT OF THORACIC ONCOLOGY

Attending Physician: Dr. Emily Nakamura, MD, PhD (Thoracic Oncology, License #CA-77204)

Patient Name: Diana Chen | Claim ID: CLM-CI-1005 | NIH Clinical Case Reference: PMC7529567 (PMID: 32869499)

Primary Diagnosis: ICD-10 C34.11 -- Invasive Malignant Neoplasm of Right Upper Lobe (RUL) Bronchus and Lung, Stage IIA.

Date of Diagnosis: February 10, 2026 (29 months after policy issuance; well past 90-day CI waiting period and 24-month contestability).

Radiograph & Histopathology Findings: Posteroanterior chest radiograph (PMC7529567 Fig. 1) and thoracic CT demonstrate a well-defined 2.8-3.0 cm mass in the right upper lung field (>= 2.0 cm Policy Section 2.1 threshold) with FDG-PET SUVmax 6.16. Transbronchial biopsy (Pathology Accession #STN-2026-8841) confirms invasive acinar pulmonary adenocarcinoma.

Certified Medical & Coroner Record submitted for Claim CLM-CI-1005 | NIH Open-i Case Source: PMC7529567 (PMID: 32869499).
