ATTENDING PHYSICIAN STATEMENT (APS) -- DIVISION OF CARDIOLOGY, UNIVERSITY HOSPI

Attending Physician: Dr. Alan Grant, MD, FACC (Chief of Electrophysiology & Cardiology, License #NY-44910)

Patient Name: Robert Sterling | Claim ID: CLM-LIFE-1002 | NIH Clinical Case Reference: PMC7033380 (PMID: 32095464)

Primary Diagnosis: ICD-10 I42.0 / I48.91 -- Chronic Dilated Cardiomyopathy, Atrial Fibrillation, and End-Stage Heart Failure.

Date of Initial Diagnosis: March 18, 2021 (More than 4 years PRIOR to policy application in July 2025).

Surgical & Implanted Device History: Permanent dual-chamber transvenous cardiac pacemaker implanted in November 2022 (pacing threshold 0.5V -> 1.5V at 40ms; sensing threshold 2.8mV; lead impedance 410 ohms).

Radiograph & Lab Findings: Emergency chest radiograph (PMC7033380 Fig. 3) demonstrates severe cardiomegaly with bilateral pleural effusions and clearly visible permanent pacemaker generator and right atrial/ventricular pacing leads in place since 2022. Labs: WBC 14,200/mm3, Hb 11.7 g/dL, D-dimer 6.04 mg/mL, CRP 10.3 mg/dL, Creatinine 1.9 mg/dL.

Certified Medical & Coroner Record submitted for Claim CLM-LIFE-1002 | NIH Open-i Case Source: PMC7033380 (PMID: 32095464).
