SECTION 1.2 -- PREFERRED PLUS UNDERWRITING REPRESENTATIONS

Issuance under the Preferred Plus Non-Smoker rate class relies materially upon the Applicant's signed health declarations confirming zero history of cardiomyopathy, congestive heart failure, coronary artery disease, cardiac arrhythmia, or implanted cardiac pacemakers/defibrillators prior to the Application Date.

SECTION 1.4 -- 24-MONTH CONTESTABILITY & MATERIAL MISREPRESENTATION RESCISSION

If a claim event occurs within twenty-four (24) months of the Policy Issue Date, OmniLife Special Investigations Unit (SIU) shall audit all pre-existing clinical records, Attending Physician Statements (APS), and thoracic radiographs. Any undisclosed chronic cardiac pathology or implanted cardiac device predating the Application Date constitutes Material Misrepresentation, voiding coverage and triggering an immediate SIU_RESCISSION_HOLD ($0 payout).
